A
MB-peptide-PEG6 probe (intact)
1 nm
MMP-9 in the wound fluid
methylene blue (redox label)
MB
A
T
L
cleavage site (between residues 7 and 8)
T
R
P
I
K
G
S
Fc-hexanethiol (present, not modelled)
PEG6 spacer (tip 1.4 nm above gold)
gold electrode
B
After MMP-9 has cut the peptide
1 nm
MB-bearing fragment released into solution (no longer electroactive)
MB
A
T
L
truncated probe stays on the gold
T
R
P
I
K
G
S
gold electrode
