MEROPS
Eckhard 2016 (PICS)
Yang 2015 (elastin)
2 Positives
P4-P4′ windows per protease (7 trainable)
3 Negatives
half: other proteases' positives, equal shares
half: Swiss-Prot 8-mers
4 Model per protease
VHSE8 (64 features)
logistic regression,
C by inner CV
+ PSSM (BLOSUM62 pseudocounts)
5 Background nulls
100,000 random 8-mers
→ score percentiles, comparable across models
6 Panel specificity
consensus: harmonic mean of LR and PSSM percentiles
margin vs strongest competitor
