[MMP-9], T
wound fluid concentration, incubation time
Part VII
F_k
fraction of probes cut (first-order kinetics)
Part VII
$(1-F_k)\Gamma_{\mathrm{tot}}$
intact MB probes remaining
Part II
$P(d)$, $k^0(d)$
where the MB label sits, how fast it exchanges
Part III
$\Delta I(E)$
square-wave voltammogram
Part IV, V
F_k^{rec}
cleavage read back from the peak height
Part VI
